Consolidation Subdivision and Emergency Generator Land Development

Dear Mr. Ryan:

This letter follows my initial review letter dated January 3, 2020 regarding the proposed consolidation subdivision and land development plans submitted by the Meadowood Corporation for the installation of emergency generators and consolidation of three (3) out parcels into their main property. My initial letter of January 3, 2020 requested additional information in conjunction with the proposed generators. Subsequent to that letter, Meadowood has provided an information packet entitled "Meadowood - Campus Wide Generator Project - Information Package" dated February 20, 2020 prepared by Woodrow & Associates. Subsequent to that information package, the applicant appeared before the Worcester Township Planning Commission on February 27, 2020 to present this project. The purpose of this letter is to provide additional comments in conjunction with the additional submitted information, and the discussions at the Planning Commission meeting

The plans propose the installation of two (2) emergency generators at the front of the property, but within the building setback line. These two emergency generators would be placed on a concrete pad that will be 103' long by 22' wide. In addition, an asphalt walkway will be constructed to access the generator from the existing Meadowood Drive. The net increase in impervious area associated with the installation of these generators will be 2,486 sq. ft. For the purposes of this land development and determining compliance with zoning, the emergency generator is considered to be an accessory use to the existing life care facility.

The plans also provides for the consolidation of three (3) adjacent parcels, recently acquired by Meadowood, into their overall main parcel and campus. Sheet 1 of 4 of the plan set identifies the main parcel and campus as Parcel "A". Parcel B is an existing property on Valley Forge Road, and Parcels C and D are existing properties on Skippack Pike. I have reviewed the plan set and the associated documentation provided to the Township in conjunction with these plans. Based on my latest review, I offer the following comments:

March 3, 2020

Ref: # 7536

Page 2

1. Information has now been provided on the two (2) proposed generators. This includes dimensional information, including the height of the generators as well as the type of enclosures that will be utilized to sound-proof the generators.
2. The applicant has indicated that the generators will be run by diesel fuel. Information on the size of the fuel storage tanks has been provided. The tanks will be beneath the generator set and will be double lined for safety.
3. Noise level information has been provided regarding the operation of the generators. This includes information when both generators are operating simultaneously. The location of the generators will be over 1,000 feet from the Worcester Elementary School and will be approximately 450 feet from the nearest off-site residential property, across Skippack Pike at the intersection of Hollow Road. Based on the information provided, the noise levels associated with operation of the generators comply with the Township's noise ordinance.
4. In my original letter, I requested information on the proposed scheduling of the exercising of the generators. At the Planning Commission meeting, Meadowood indicated that the generators would be exercised one time per week for a period of 30 minutes. The generators could be scheduled to be exercised independent of one another in order to reduce the noise associated with running both generators simultaneously. Meadowood did indicate that they could schedule the exercising of each generator independently. The specific scheduling of the exercising of the generators has not been determined, but this information should be provided to the Township.
5. The applicant is proposing a screening buffer in front of the generator layout. This includes ten (10) Norway Spruce, (3) Red Oak Trees, and three (3) Eastern Red Buds. Various other landscaping on the north side of the generator is also proposed. There are numerous existing trees in the area of the generators that will be preserved in the installation process. Based on the proposed landscaping, a visual buffer will be provided to shield the generators and to meet the requirements of Section 130-28G(5)(f) regarding a screening buffer.
6. The applicant has indicated that the only lighting on the site will be emergency lighting that will be activated if there is a need to service the generators at night. This will be a light activated at the site and will be only on for the time required to service the generators. No permanent lighting is proposed at the generator site.
7. The applicant submitted a stormwater management plan in conjunction with this project. This proposed generator system will add 2,486 sq. ft. of impervious coverage. The applicant has prepared a stormwater plan which will result in the installation of an infiltration seepage pit on the south side of the generator pad. Based on the information provided in the stormwater management report, the applicant has adequately addressed the stormwater requirements in conjunction with this project.

March 3, 2020

8. Sheet 1 of the plan set shows the consolidation of three (3) parcels into the existing main "campus" of Meadowood. Information on the four (4) affected parcels is as follows:
- A. Parcel A - (Block 28, Unit 28) - Existing Meadowood Campus - 112.2852 acres
 - B. Parcel B - (Block 28, Unit 39) - 2.3564 acres
 - C. Parcel C - (Block 29, Unit 1) - 0.8079 acres
 - D. Parcel D - (Block 29, Unit 2) - 2.7562 acres

In addition to the above four (4) parcels, there is a PECO lease hold area (Block 28, Unit 66) of 12.8761 acres on the property. Based on all of these parcels, the resulting property would be 131.087 gross acres and 109.756 developable acres.. All of the impervious coverage requirements and building coverage requirements resulting from the consolidation of these parcels has still been met.

9. The Meadowood Corporation appeared before the Worcester Township Planning Commission on February 27, 2020. At that meeting, the Planning Commission voted unanimously to approve the consolidation subdivision plan, and also the generator land development plan.

The above represents all comments on this project. These plans are ready for consideration for approval by the Worcester Township Board of Supervisors. Please do not hesitate to contact me if you have any questions or need any additional assistance on this project.

Dear Mr. Ryan:

We have reviewed the above-referenced subdivision and land development plan in accordance with Section 502 of Act 247, "The Pennsylvania Municipalities Planning Code," as you requested on January 27, 2020. We forward this letter as a report of our review.

BACKGROUND

The applicant, The Meadowood Corporation, is proposing to install an accessory generator station to their existing senior living complex in the LPD Land Preservation District. The generator station will consist of two generator structures, a concrete pad, and surrounding landscaping screening the structures. Additionally, the applicant is seeking to consolidate four parcels, which constitute 'The Meadowood Property,' into a single parcel. No habitable square footage is proposed as a part of this application.

The Montgomery County Planning Commission (MCPC) generally supports the applicant's proposal without comment, as we have found it to be generally consistent with the LPD District and have not found significant planning, design, transportation or environmental issues regarding the proposal.

Please note that the review comments and recommendations contained in this report are advisory to the municipality and final disposition for the approval of any proposal will be made by the municipality.

Should the governing body approve a final plat of this proposal, the applicant must present the plan to our office for seal and signature prior to recording with the Recorder of Deeds office. A paper copy bearing the municipal seal and signature of approval must be supplied for our files.

Sincerely,

A handwritten signature in black ink that reads "Brian J. Olszak". The signature is written in a cursive style with a large initial "B".
