2044 Berks Road

Dear Mr. Ryan:

CKS Engineers, Inc. is receipt of a final plan submission for the subdivision of the Josephine Sparango property (Sparango Construction Co.) at 2044 Berks Road. The subdivision plans were prepared by Joseph M. Estock, P.E., P.L.S. of King of Prussia, Pennsylvania. The subdivision plan set consists of 12 sheets, dated October 7, 2016, last revised March 8, 2019. In addition to the subdivision plan, the submission also included a "Post-Construction Stormwater Management, Written Narrative, for 2044 Berks Road", also prepared by Joseph M. Estock, dated March 9, 2018 and last revised March 8, 2019. The Stormwater Management report also included a seven (7) sheet plan set which provided the information required for preparation of the stormwater management report. This plan set is dated March 9, 2018 and has a latest revision date of March 8, 2019.

The subdivision plan proposed the development of 8 single-family detached lots on the 16- acre property with a new cul-de-sac street (Josephine Way) extended from Berks Road. Seven of the lots will take access from the new street and one will take access directly from Berks Road. The site currently contains one (1) single family house with a detached garage, both of which are to be removed. The site is located in the "AGR - Agriculture Zoning District" and is being developed in accordance with Section 150-12 through 150-17 of the Worcester Township Zoning Ordinance. CKS Engineers Inc., previously reviewed plans for this subdivision and set forth review comments in letters dated November 11, 2016, April 4, 2018, and August 2, 2018. This subdivision plan received preliminary approval from the Township of Worcester Board of Supervisors by Resolution 2018-35 on September 19, 2018. We have reviewed this final plan submission to verify compliance with the conditions of the preliminary approval resolution and also any outstanding items set forth in previous review letters. Based on our review of this latest set of plans, we offer the following comments:

1. The Worcester Township Board of Supervisors granted the following waivers as part of the preliminary approval resolution (2018-35).
 - A. §130-16.C.1.6 of the Worcester Township Subdivision and Land Development Ordinance - to permit a 20-foot cartway width along Berks Road rather than the required 38-foot wide minimum cartway along a feeder street;
 - B. §130.18.A of the Worcester Township Subdivision and Land Development Ordinance - requiring installation of sidewalks along Berks Road;
 - C. §130.18.B.1.a of the Worcester Township Subdivision and Land Development Ordinance - requiring installation of concrete curb along Berks Road;
 - D. §130-20.A.4 of the Worcester Township Subdivision and Land Development Ordinance - to permit corner Lots 1 and 7 to have a width of less than 1.5 times the minimum width of interior lots;
 - E. §130-20.C.3 of the Worcester Township Subdivision and Land Development Ordinance - to permit the proposed rain garden discharge at FES 16 into the side yard of Lot 4; and
 - F. §130-18.B.1 of the Worcester Township Subdivision and Land Development Ordinance - to permit 18" deep curbing rather than the required 22" deep curbing.
2. The Preliminary Plan approval resolution includes as a condition, the payment to the Township of a Traffic Impact Fee in the total amount of \$27,839.00. This should be paid on a per lot basis and at the time of submission of a building permit for each of the dwellings to be built on the eight (8) lots, in the amount of \$3,479.87, per lot.
3. Prior to recording of the final plans, the applicant shall purchase eight (8) EDU's at \$1,900.00 per EDU for sewage capacity at the Valley Green Wastewater Treatment Plant.
4. The plans must receive final approval from the Montgomery County Conservation District in conjunction with Erosion and Sedimentation control for this project. A NPDES Permit for stormwater discharge must also be obtained for this project.
5. DEP Planning approval must be obtained for this project in conjunction with the proposed public sewer. It is my understanding that the Planning Module Submission has been made to DEP and it is in the process of being reviewed.
6. A DEP Water Quality Management Permit, Part II, must be obtained prior to any construction on the sanitary sewer system. This permit is required since grinder pumps will be utilized for the eight (8) proposed lots.

7. The low pressure force main from this project will be connected to the force main that is to be constructed along Skippack Pike in conjunction with the Reserve at Center Point Project. The design of the Reserve force main has included a connection point for this project. However, no Use and Occupancy Permits can be issued for this project until the pumping station and forcemain being constructed as part of the Reserve project is completed, tested, and placed in service.
8. The applicant is reminded that as part of the NPDES permit requirement for this project, a "Notice of Termination" must be submitted upon completion of the project. This Notice of Termination must be prepared by the applicant's engineer. It is therefore, recommended that the applicant's engineer be aware of this requirement and those tasks necessary for completion of the Notice of Termination application upon completion of the project.
9. The applicant has received a letter from the North Penn Water Authority dated October 5, 2018 confirming that they have an existing water main in the area of the project and that they intend to provide this development with public water service.
10. All technical issues set forth in our previous review letters have now been adequately addressed with this final plan submission. In addition, a review of the "Post-Construction Stormwater, Written Narrative", and also the plans submitted in conjunction with that document have been reviewed. All comments relative to this stormwater management for this project have been resolved and the stormwater plan is acceptable.
11. In conjunction with the stormwater report, the applicant is directed to page 4, "Resolutions to Soil Limitations". Due to a high water table on this site, this report recommends the following:

"All building foundations are to be designed to withstand high water table conditions. This includes basement wall waterproofing, the installation of foundation drains, and the installation of sump pumps. A pump water filter bag is to be used when groundwater is encountered during construction activities. When evidence of high water table conditions are observed, appropriate measures must be used to mitigate these conditions such as the installation of under drains, pumping, water proofing, etc."

All building plans shall incorporate these recommendations.
12. The applicant's engineer shall prepare a construction cost estimate for all subdivision improvements for use in determining the construction escrow required for this project.
13. The applicant's engineer shall prepare the legal descriptions for all rights-of-way and easements shown on the subdivision plans.

Upon resolution of the above remaining items to the satisfaction of the Township, these plans can be considered ready for final approval by the Township of Worcester Board of Supervisors. Please contact me if you have any questions or need any further assistance on this project.

Very truly yours,

RE: **Traffic Review #3**
2044 Berks Road (LD 2016-05)
Worcester Township, Montgomery County, PA
McMahon Project No. 818262.11

Dear Tommy:

Per the request of the Township, McMahon Associates, Inc. (McMahon) has prepared this comment letter, which summarizes our traffic engineering review of the proposed development to be located at 2044 Berks Road in Worcester Township, Montgomery County, PA. It is our understanding that the proposed development will consist of 8 single-family homes. Access to Lots 1 through 7 will be provided via roadway connection (Josephine Way) to Berks Road while access to Lot 8 will be provided via a direct driveway connection to Berks Road to the north of Josephine Way. It is our understanding that the existing single-family home on this lot will be removed as part of this proposed development.

The following document was reviewed and/or referenced in preparation of our traffic review:

- Land Development Plans for 2044 Berks Road, prepared by Joseph M. Estock Consulting Engineers and Land Surveyors, last revised March 8, 2019.

Based on our review of the submitted document noted above and a field view of the proposed site, McMahon continues to offer the following comments for consideration by the Township and action by the applicant:

1. According to **Section 130-16 of the Subdivision and Land Development Ordinance**, residential roads shall have a minimum paved width of 32 feet. The plans currently show a 28-foot cartway width along Josephine Way, thereby not satisfying the ordinance requirement. A waiver must be requested to allow a 28-foot cartway width along Josephine Way. It should be noted that according to Note 15 on Sheet 1, parking will be restricted to one side of Josephine Way. Since parking will be restricted to one side of Josephine Way, we are not opposed to the granting of this waiver, which is not currently contained in the Granted Waiver List on sheet 1 of 12.

Mr. Tommy Ryan

Page 2 of 2

2. Turning templates should be provided demonstrating the ability of a trash truck and fire/emergency vehicles specific to Worcester Township to maneuver into and out of Josephine Way and through the cul-de-sac. It should be noted that according to **Section 130-16.C.1[5][b]** of the **Subdivision and Land Development Ordinance**, an outer paved radius of 40 feet, which is shown on the plans, is acceptable. However, we continue to recommend that a trash truck and fire/emergency vehicle turning template be provided to show that it will indeed be satisfactory. The Fire Marshall should also review these plans for approval.
3. According to the Township's Roadway Sufficiency Analysis, the proposed development is located in Transportation Service Area North, which has a corresponding impact fee of \$3,977 per "new" weekday afternoon peak hour trip and the applicant will be required to pay a Transportation Impact Fee in accordance with the Township's Transportation Impact Fee Ordinance. Based on Land Use Code 210 (Single Family Detached Housing) in the Institute of Transportation Engineers publication, **Trip Generation**, Tenth Edition, the 8 single-family homes will generate approximately 8 total "new" weekday afternoon peak hour trips. Providing a credit of one new trip for the existing single-family home, the number of trips subject to the transportation impact fee is 7. The TSA North impact fee of \$3,977 per "new" weekday afternoon peak hour trip applied to the 7 trips results in a transportation impact fee of \$27,839.

Based on a review of the document listed above, the applicant should address the aforementioned comments, and provide revised plans, and accompanying materials as appropriate, to the Township for further review and approvals. A response letter that addresses the comments contained herein should accompany the resubmission, indicating how each item has been addressed, and where the changes have been made in the documents being resubmitted.

We trust that this review letter responds to your request. If you or the Township have any questions, or require clarification, please contact me.

Sincerely,

Casey A. Moore, P.E

Re: MCPC #16-0124-002
Plan Name: 2044 Berks Road
(8 lots on 16.39 acres)
Situate: Berks Road (E)/North of Skippack Pike
Worcester Township

Dear Mr. Ryan:

We have reviewed the above-referenced land development plan in accordance with Section 502 of Act 247, "The Pennsylvania Municipalities Planning Code," as requested on October 19, 2016. This letter is submitted as a report of our review and recommendations.

BACKGROUND

The applicant, Pat Sparango c/o Sparango Construction Company, is proposing to build eight new units on eight total lots in a traditional subdivision located in the township's AGR-Agricultural District. The subdivision contains an existing house to be demolished. Our office reviewed a previous sketch plan for this site that showed a total of seven new units in a conservation subdivision and would have preserved the existing house along Berks Road.

COMPREHENSIVE PLAN CONSISTENCY

- A. Worcester Township Comprehensive Plan - The proposal is generally consistent with the Worcester Comprehensive Plan. The plan designates this area as "countryside" which should be "dominated by farms, horse pastures, woods, riparian corridors, and country roads." A traditional large-lot

subdivision is appropriate here, though we would have preferred to have the conservation subdivision which would have preserved the existing woodlands and home.

- B. Monto 2040: A Shared Vision - The proposal is generally consistent with the Montgomery County Comprehensive Plan, *Montco 2040: A Shared Vision*. This part of Worcester Township is located in the Rural Resource Area. This area should consist of "open land with a traditional rural appearance that includes farms, small woodlands, some low density residential homes, and rural villages." One of the primary uses for this area is "low-density residential development that is clustered or has a rural character." Though these homes are not in a cluster subdivision, the large lots will maintain the rural character.

RECOMMENDATION

The Montgomery County Planning Commission (MCPC) generally supports the applicant's proposal. However, we provide the following feedback, which we feel will help create a more attractive and sustainable development:

REVIEW COMMENTS

OLD PLAN

- A. Conservation Subdivision - The sketch plan that preceded this version of the proposal showed a conservation subdivision that preserved the existing home and over 300,000 square feet of contiguous woodlands. The new plan has abandoned this concept for a traditional large-lot subdivision. The township should discuss the reasoning for this change with the applicant. The conservation subdivision would be a more sustainable option.

STREETS

- A. Cartway Width - The cartway width appears to be 28 feet. For a rural area a road that serves large-lot subdivisions such as these does not need to be wide enough to accommodate on-street parking. A 20-foot wide cartway would be sufficient to accommodate two-way traffic in this situation. The benefits of a narrower cartway include reduced impervious surface and improved safety due to the traffic calming effect.

CONCLUSION

We wish to reiterate that MCPC generally supports the applicant's land development proposal, but we believe that our suggestions will create a more attractive and sustainable development. We prefer the conservation subdivision option that we originally reviewed because we felt that it did a great job of creating an attractive and more sustainable development.
